Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species 1, claims 1-17, drawn to methods of depositing ceramic, forming a gap, and controlling the width of the gap.

Species 2, claims 18-23, drawn to methods of depositing insulating material, forming a gap, and reshaping the gap.

Species 3, claims 24-26, drawn to methods of forming a groove bordered by a ridge, then forming the groove to follow a direction of a fluid stream.

Species 4, claims 27-31, drawn to methods of depositing a ceramic, form first plurality of grooves at a first depth, form second plurality of grooves at a second depth.

Species 5, claims 32-34, drawn to methods of depositing ceramic, forming first plurality of grooves, depositing second ceramic, forming second plurality of grooves.

Species 6, claim 35, drawn to a method of applying a bond coating and applying a thermal barrier coating and engraving grooves on opposed sides of the location.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim

Art Unit: 1725

is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
